

Coding & Solution

Date	08 July 2026
Team ID	XXXXXX
Project Name	EduGenie Google Gemini Powered Learning Assistant
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/kundanakriti/EduGenie-AI-Learning-Assistant
Programming Language(s)	Python, HTML, CSS, JavaScript
Framework(s) Used	FastAPI, Uvicorn
Key Features Implemented	AI Question Answering, Concept Explanation, Text Summarization, Quiz Generation, Personalized Learning Path Recommendation
Pending / Incomplete Features	User Authentication, Database Integration, User Progress Tracking, Chat History
Setup / Run Instructions	1. Install Python 3.12+. 2. Run pip install -r requirements.txt. 3. Add the Gemini API key to the .env file. 4. Run uvicorn main:app --reload. 5. Open http://127.0.0.1:8000 in a browser

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The EduGenie AI Learning Assistant is built using a modular architecture with separate modules for Question Answering, Concept Explanation, Text Summarization, Quiz Generation, and Learning Path Recommendation. The application integrates the Google Gemini API for intelligent responses and uses FastAPI with a responsive HTML/CSS frontend. The project is fully functional, easy to maintain, and can be extended with features such as authentication, database storage, and user progress tracking in future versions.
