

Project Executable Files

Date	2 JULY 2026
Team ID	xxxxxx
Project Name	EduGenie Google Gemini Powered Learning Assistant
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide	Yes
3	requirements.txt (dependency file)	Yes
4	Database schema / seed files	NA
5	Environment configuration file (.env.example)	Yes
6	Deployed application URL	No
7	Executable / APK	NA
8	Dockerfile / Containerization	No
9	Test files and test results	Yes
10	Demo video / Walkthrough	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

EduGenie-AI-Learning-Assistant/

```

— app.py
— requirements.txt
— README.md
— .env.example

— templates/
  — index.html

— static/
  — css/
  — js/
  — images/

— services/
  — qna.py
  — explain.py
  — summarize.py

— utils/
  — helper.py

— tests/
  — test_api.py

— docs/
  — Project Documentation
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	
Login Credentials	Not Required
Platform / Hosting Provider	Local FastAPI Server
Repository Link	GitHub Repository (Your Project Link)
Demo Video Link	Google Drive / YouTube Demo Link

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites

- ✓ Python 3.12+
- ✓ Visual Studio Code
- ✓ pip
- ✓ Internet connection (for Gemini API)
- ✓ API Key configured in .env

Steps:

1. Clone the repository.
2. Install dependencies:
`pip install -r requirements.txt`
3. Configure the .env file with your Gemini API Key.
4. Start the application:
`python app.py`
(or `uvicorn app:app --reload` if using FastAPI)
5. Open your browser and visit:
`http://127.0.0.1:8000`
6. Test the APIs using Swagger UI or Postman.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Internet connection required for Gemini API	Ensure a stable internet connection
2	AI responses may take longer for lengthy inputs	Normal behavior; retry if needed
3	Application is not yet deployed to cloud	Runs successfully on local system
