

Solution Requirements

Date	27 June 2026
Team ID	XXXXXX
Project Name	EduGenie Google Gemini Powered Learning Assistant
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	<i>Users can securely log in using email/Google account to access personalized learning content.</i>	High
2	Authorization levels	<i>Student users can access learning features, quizzes and progress tracking. Admin can manage content and users.</i>	Medium
3	External interfaces	<i>Integrates with Gemini API for AI responses and educational content generation.</i>	High

4	Transactions processing	<i>Processes user queries, generates AI responses, evaluates quizzes, and stores learning history.</i>	High
5	Reporting	<i>Generates learning progress reports, quiz scores, and performance analytics</i>	Medium
6	Business rules, etc.	<i>AI recommendations are generated based on user interests, learning history, and performance.</i>	High
7	Compliance to laws or regulations	<i>User data is securely stored and handled according to data privacy standards.</i>	Medium
8	<i>Other</i>	<i>Supports personalized study plans, doubt clarification, and AI-generated summaries.</i>	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	<i>AI responses should be generated quickly</i>	<i>Response time < 3 seconds</i>
2	Scalability	<i>System should support increasing numbers of users.</i>	<i>Supports 500+ concurrent users</i>
3	Security & Data Privacy	<i>User data must be encrypted and securely stored.</i>	<i>Secure authentication and encrypted storage</i>
4	Reliability & Availability	<i>Application should be simple, responsive, and easy to use.</i>	<i>99% uptime</i>
5	Usability & Accessibility	<i>Interface should be simple, responsive, and easy to use.</i>	<i>Easy navigation with responsive design</i>
6	Other	<i>Code should be modular and easy to update or deploy</i>	<i>Modular architecture and cloud deployment support</i>
